The treatment landscape of chronic lymphocytic leukemia (CLL) continues to evolve rapidly: updated recommendations and new study data are shaping the choice of first-line therapy. We cordially invite you to our webinar «CLL in 2026: Navigating New Treatment Choices» on 26 November 2026.

Together with renowned experts from Zurich, Lucerne and Berlin, we will summarise the latest updates to the EHA guidelines, take a detailed look at the AMPLIFY data and use case examples to discuss which treatment strategy suits which patients in everyday clinical practice. The concluding interactive discussion will focus on one key question: continuous or fixed-duration treatment in the first line?

The webinar will be held online and in English. We look forward to your participation and to a lively exchange among colleagues.
