For specialists in hematology and oncology

Dear Colleagues,

We are pleased to invite you to an interdisciplinary event addressing the key challenges in managing immune-mediated toxicities associated with novel oncological therapies. This event is aimed in particular at oncologists and haematologists.

The increasing use of modern oncological and immunological therapies raises new clinical questions that require both a thorough understanding and close collaboration across different specialties.

During this event, experts from the fields of haematology, cardiology, neurology, and dermatology will address the most frequently encountered adverse effects in clinical practice. Through concrete clinical cases, you will gain practical insights into diagnosis, risk assessment, and therapeutic strategies. Each session will conclude with a short question-and-answer round to encourage exchange and discussion.

We look forward to welcoming you and sharing our perspectives with you.

Best regards,

Chair:

Prof. Nicolas Bonadies

Praxis Bonadies

Program

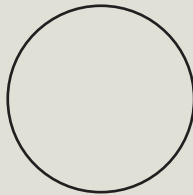

Time	Title	Speaker
18:00 - 18:20	Introduction	Prof. Nicolas Bonadies
18:20 - 18:45	Cardiotoxicity	Prof. Thomas Suter
18:45 - 19:10	Aquired hypogammaglobulinemia and infectious risks	TBC
19:10 - 19:35	Neurotoxicities	Prof. Oliver Scheidegger
19:35 - 20:00	Dermatotoxicities	Dr. Pauline Bernard
20:00	Apéro dinner
