## The presidents Invitation

Aarau, May 14th, 2018

Dear Members and interested professionals,

We cordially invite you to join the SCS Spring Meeting 2018 in Bern on June 1st, 2018.

We are very happy to welcome **Prof. Maryalice Stettler-Stevenson**, MD/PhD, from the *NIH, Bethesda, US* – a great researcher, lecturer and mentor. She will talk about her research and experience with the development of flowcytometric strategies to monitor patient undergoing therapy with novel agents: **“Immunophenotypic monitoring of patients undergoing immune therapy”**. She will give a general introduction about various novel therapies and how they impact disease detection, which will be illustrated with cases.

Her presence at a SCS meeting has been repeatedly requested by members of the SCS listening to her lecturing at international congresses, and we are delighted she accepted our invitation despite her very busy agenda.

The meeting will start at 13:30 in Bern, Mehrzweckraum D102/D103 Frauenklinik Inselspital Bern and ends at 16:30 to release you into the weekend.

I very much look forward to seeing you soon in Bern at this exciting meeting on a very hot and important topic!

Sincerely,

Paula Fernandez,  
President of the SCS
