Role of MRI in the Diagnosis and Monitoring of Iron Overload

Wednesday, 29 March 2017, 17.30–20.15 h
 Hotel Warwick Geneva, Rue de Lausanne 14, 1201 Geneva

Agenda:

17.30	Welcome and introduction	<i>Dr. K. Samii and Prof. J.-P. Vallée, Hôpitaux universitaires de Genève</i>
17.35	Case opening	<i>TBD</i>
17.45	Monitoring iron overload – why, when and how to measure the invisible danger	<i>Prof. W.-K. Hoffmann, Universitätsklinik Mannheim</i>
18.15	Discussion & Questions	<i>All</i>
18.25	Monitoring iron overload by MRI – non-invasive quantification of organ iron	<i>Prof. J. Yamamura, Universitätsklinikum Hamburg-Eppendorf</i>
18.55	Discussion & Questions	<i>All</i>
19.05	Break	
19.20	Case closing	<i>TBD</i>
19.30	Discussion & Questions	<i>All</i>
19.40	Exchange of experience and interactive panel discussion	<i>Dr. K. Samii and Prof. J.-P. Vallée</i>
20.10	Wrap up and good bye	<i>Dr. K. Samii and Prof. J.-P. Vallée</i>
20.15	Apéro	

CME credits from the following associations will be applied for: SGH, SGR-SSR, SGAIM

**Wolf-Karsten Hofmann,
M.D. and Ph.D.**

Department of Haematology
and Oncology,
University Hospital,
Mannheim, Germany

Wolf-Karsten Hofmann has been professor of medicine and head of the department of haematology and oncology, University Hospital Mannheim, Germany, since May 2009. He has focused his scientific activities on translational research projects, utilizing highthroughput molecular techniques for the genomic analysis of primary tumour cells from patients with haematological malignancies, in particular patients with myelodysplastic syndromes (MDS) and acute lymphoblastic leukaemia. His research group was the first to describe the complete transcriptional program of differentiating haemopoietic stem cells. Since 2012, Professor Hofmann serves as the speaker of the German MDS-project which is funded by the German Cancer Research Society.

**Jin Yamamura,
M.D.**

Department and Clinic of Diagnostic
and Interventional Radiology,
University Medical Center Hamburg-
Eppendorf (UKE), Germany

Jin Yamamura was associate professor for diagnostic and interventional radiology at the University Medical Center Hamburg-Eppendorf since 2010 and has been appointed full professor at the same institute in December 2016. Among his main research interests are MR relaxometry for iron quantification, multiparametric MRI in hepatic pathologies and lipid and phosphor MR-Spectroscopy. Furthermore, he is a reviewer for multiple peer-reviewed radiology journals.

Role of MRI in the Diagnosis and Monitoring of Iron Overload

Wednesday, 29 March 2017, 17.30–20.15 h • Hotel Warwick Geneva, Rue de Lausanne 14, 1201 Geneva

- I will participate
- Unfortunately, I am otherwise engaged and cannot participate
